

Columbia Water & Light Custom Rebate Application

A pre-inspection is required for all projects.

- Project approval is predicted solely on the discretion of Columbia Water & Light.
- Application must be accompanied by engineering analysis, manufacturer specification sheets and a W-9 form.
- Eligibility requires customers to be receiving electric service on the Industrial or Commercial rate.
- All projects require Columbia Water & Light approved inspections for both pre and post modifications.

Applicant information		
Business name		CW&L electric account number
Contact person name & title		Recipient to make check payable to
Address of installation		Mail check to (complete address)
Contact phone number(s)	E-mail	Business tax ID# or Social Security # of recipient

Contractor information	
Contractor name & address	Phone number

Facility description
Provide a brief description of the facility.

Project summary
Provide a description of the equipment or systems that are being replaced or changed along with what it is being replaced by. Attach manufacturer specification sheets for both existing and new equipment.
Project cost _____ Project start date _____ Scheduled completion date _____

Electric load and energy savings
Using industry accepted engineering algorithms, calculate the load reduction (kW) and the annual electric savings (kWh/Year) by estimating the annual electric usage of both the existing and proposed equipment, based on the current operation of the facility. Attach the appropriate calculations and documentation of sources and any assumption used in the calculations.
Calculations and all assumptions are attached? Yes <input type="checkbox"/> No <input type="checkbox"/> kW reduction _____ Annual kWh savings _____

Columbia Water & Light use only				
Pre-inspection date	Signature		Approval letter sent date	
Post inspection date	Signature		Equipment removed <input type="checkbox"/> Yes	
Final kW reduction	Final kWh reduction	Final project cost	Final rebate amount	Date paid
